1. Students may be undergraduate or graduate students and must be enrolled in a computer systems engineering, computer science, electrical engineering, materials engineering or industrial engineering degree.

2. Students may work as interns up to a maximum of three semesters.

3. Students must work 20 hours per week at the industry member site during spring and fall semesters and 40 hours per week during summer session. Each student is expected to complete 340 hours during the spring and fall semester and 440 hours for the summer.

4. Students must also be enrolled full-time as undergraduates and have completed (or be currently completing) the minimum required courses in the Embedded Systems curriculum. For Arizona State University, these required courses are CSE 230 and CSE 325.

5. International students may work as interns up to a maximum of two semesters. They must be eligible for Curricular Practical Training (CPT).

6. Students (undergraduate or graduate) must have a minimum GPA of 3.0 at the time of application.
